METALS & ALLOYS

Volume V—January 1934 to December 1934

SUBJECT INDEX

Action of Fluorspar on Open Hearth Basic Slags.—Lenher Schwerin (Cor. Abs.). 61, 83

Adnic.—W. B. Price. 77
——Development. W. B. Price. 71

Age-Hardening Characteristics of Some Copper-Nickel-Silicon Alloys.—Bruce W. Gonser & L. R. van Wert. 251, 281

—— of Duralumin, Rate as determined by Upsetting Tests.—J. O. Lyst. 57

Alloying Element in Steel, Copper.—H. L. Miller. 227

Aluminum and two of its Alloys, Properties at Elevated Temperatures.—F. M. Howell & D. A. Paul. 176

Ammonia Gases, Deterioration of Chromium-Tungsten Steels in.—Peter R. Kosting. 54

Annealed Sheet Steel, Fluting and its Elimination.—George L. Clark & Wayne A. Sisson. 103

Apparatus and Method for Metallographic Work at Low Temperatures.—O. A. Knight. 256

Atomic and Weight Percentages, Interconversion of.—J. S. Marsh. 48

Babbitt, Bonding Strength to Steel and Bronzes.—E. G. Soash. (Ext. Abs. by H. W. Gillett). 268

Bakelite, Mounting for small Metallographic Specimens and Metal Powders.—J. L. Everhart & H. M. Schleicher. 59

Basic Slags, Effect of Fluorspar on Viscosity.—Lenher Schwerin. 118

—— ——, Open Hearth, Action of Fluorspar on.—Lenher Schwerin (Cor. Abs.) 61, 83

Bearing Metals of Lead Hardened with Alkali and Alkaline Earth Metals.—Leland E. Grant. 161, 191

Bonding Strength of Babbitt to Steel and Bronzes.—E. G. Soash. (Ext. Abs. by H. W. Gillett). 268

Case Histories
- Development of Adnic.—W. B. Price. 71
- Development of Submerged Resistor Induction Furnace.—G. H. Clamer. 242
- Development of "Y" Lacquer.—Robert W. Belfit. 147
- "For to Catch a Whale."—John Howe Hall. 221
- Is there a Test for Machinability?—H. W. Graham. 93
- Research Pays Profits—Experiences in Successful and Unsuccessful Research.—H. W. Gillett. 23
- Metallurgical Research should suit Type of Research to Problem.—O. W. Ellis. 165
- Some Principles of Industrial Research.—H. A. Schwartz. 49

Cast Iron, "Heredity" in.—H. W. Gillett (Cor. Abs.) 184

—— ——, Impact Resistance at Elevated Temperature.—F. B. Dahle. 17

Chromium, Production of Pure.—P. P. Alexander. 37

Chromium-Tungsten Steels, Deterioration in Ammonia Gases.—Peter R. Kosting. 54

Copper as an Alloying Element in Steel.—H. L. Miller. 227

——, development of Patina on, after Installation.—J. R. Freeman, Jr. & P. H. Kirby. 67

—— **Plate,** Method to determine Thickness on Steel, Brass and Zinc Die Castings.—Fred Carl. 39

Copper-Nickel-Silicon Alloys, Age-hardening Characteristics.—Bruce W. Gonser & L. R. van Wert. 251, 281

Correlated Abstracts
- Action of Fluorspar on Open Hearth Basic Slags.—Lenher Schwerin. 61, 83
- "Heredity" in Cast Iron.—H. W. Gillett. 184
- Internal Stresses.—Charles S. Barrett. 131, 154, 170, 196, 224

Corrosion Tests on Weld Deposits.—F. R. Hensel & C. S. Williams. 11

Crystal Structure as a Guide in the Working of Magnesium Alloys.—W. Schmidt (trans. by G. E. Doan). 149

Deep-drawing, Non-aging Iron and Steel for.—R. O. Griffis & Anson Hayes. 110

Dentistry, Metals and Alloys in.—Oscar E. Harder. 236

Deterioration of Chromium-Tungsten Steels in Ammonia Gases.—Peter R. Kosting. 54

Development of Adnic.—W. B. Price. 71

—— of the Submerged Resistor Induction Furnace.—G. H. Clamer. 242

—— of "Y" Lacquer.—Robert W. Belfit. 147

—— During the Past Five Years, Non-Ferrous.—Sam Tour. 213

Developments during the Past Five Years, Ferrous.—H. S. Rawdon. 207

Die Casting Alloy, Zinc.—E. A. Anderson & G. L. Werley. 97

—— —— **Alloys,** Dimensional Changes.—R. G. Kennedy, Jr. 106, 124

Dimensional Changes in Die Casting Alloys.—R. G. Kennedy, Jr. 106, 124

Duralumin, Rate of Age-Hardening as determined by Upsetting Tests.—J. O. Lyst. 57

Economic Results of Metallurgy.—Samuel L. Hoyt. 113

Effect of Fluorspar on the Viscosity of Basic Slags.—Lenher Schwerin. 118

—— —— Notches on Nitrided Steel.—J. B. Johnson & T. T. Oberg. 129

—— —— Stress on the Transformation Temperature of Iron.—J. L. Holmquist. 136

—— —— Surface Strain on Solid Solubility.—R. M. Brick & Arthur Phillips. 204

Elevated Temperature Impact Resistance of Cast Iron. F. B. Dahle. 17

—— —— **Tests.** Furnaces for.—J. W. Bolton & H. Montgomery. 127

Enameling Iron—Its Behavior in Enameling.—Karl Kautz. 167

Ferrite. Properties as revealed by Scratch Hardness Tests.—H. W. Gillett (Ext. Abs.) 159

Ferrous Metallurgical Developments during Past Five Years.—H. S. Rawdon. 207

Fluorspar. Action on Open Hearth Basic Slags.—Lenher Schwerin (Cor. Abs.) 61, 83

——, Effect on the Viscosity of Basic Slags.—Lenher Schwerin. 118

Fluting in Annealed Sheet Steel and its Elimination.—George L. Clark & Wayne A. Sisson. 103

"For to Catch a Whale"—John Howe Hall. 221

Furnace Temperature Uniformity. Metallographic Method for Determining.—E. H. Dix, Jr. & A. C. Heath, Jr. 10

Furnaces for Elevated Temperature Tests.—J. W. Bolton & H. Montgomery. 127

"Heredity" in Cast Iron.—H. W. Gillett (Cor. Abs.). 184

Impact Resistance of Cast Iron at Elevated Temperature.—F. B. Dahle. 17

—— **Tests** of Medium Manganese Steel Plate, at Low Temperature.—H. W. Hiemke & W. C. Schulte. 31

Induction Furnace. Development of the Submerged Resistor.—G. H. Clamer. 242

Industrial Research. Some Principles.—H. A. Schwartz. 49

Interconversion of Atomic and Weight Percentages.—J. S. March. 48

Internal Stresses.—Charles S. Barrett (Cor. Abs.). 131, 154, 170, 196, 224

Is there a Test for Machinability.—H. W. Graham. 93

Locomotive Tires. A Discussion of the Causes of Typical Tire Failures.—Leland E. Grant. 231, 277

Low Temperature Impact Tests of Medium Manganese Steel Plate.—H. W. Hiemke & W. C. Schulte. 31

Lowering Welding Costs by Careful Selection of Steels.—Wilmer E. Stine. 74

Machinability, is there a Test for.—H. W. Graham. 93

Magnesium Alloy Plates. Plastic Deformation at a Hole in.—R. H. Burns & R. H. Heyer. 284

—— **Alloys,** Crystal Structure as a Guide in Working.—W. Schmidt (trans. by G. E. Doan). 149

Magnetic Materials. A Survey in Relation to Structure.—W. C. Ellis & Earle E. Schumacher. 269

Manganese Steel Plate, Low Temperature Impact Tests.—H. W. Hiemke & W. C. Schulte. 31

Manufacture of Rimmed Steel Ingots.—J. H. Nead & T. S. Washburn. 43

Metallographic Determination of the Size Distribution of Temper Carbon Nodules. H. A. Schwartz. 139

—— **Method** for Determining Furnace Temperature Uniformity.—E. H. Dix, Jr. & A. C. Heath, Jr. 10

—— **Specimens** and Metal Powders, mounting in Bakelite.—J. L. Everhart & H. M. Schleicher. 59

—— **Work** at Low Temperatures, Apparatus and Method.—O. A. Knight. 256

Metallurgical Advances Reflected in Engineering Design.—Robert W. Carson. 217

—— **Research** Should Suit Type of Research.—O. W. Ellis. 165

Metallurgy, Economic Results of.—Samuel L. Hoyt. 113

Metals and Alloys in Dentistry.—Oscar E. Harder. 236

—— —— —— in the Pulp and Paper Industry.—J. D. Miller. 263

Method to Determine Copper and Nickel Plate Thickness on Steel, Brass and Zinc Die Castings.—Fred Carl. 39

Mounting of Small Metallographic Specimens and Metal Powders in Bakelite.—J. L. Everhart & H. M. Schleicher. 59

Nickel Plate, Method to determine Thickness on Steel, Brass and Zinc Die Castings.—Fred Carl. 39

Nitricastiron.—D. L. Edlund & V. O. Homerberg. 141

Nitrided Steel, Effect of Notches on.—J. B. Johnson & T. T. Oberg. 129

Non-aging Iron and Steel for Deep-Drawing.—R. O. Griffis & Anson Hayes. 110

Non-Ferrous Metallurgical Developments During the Past Five Years.—Sam Tour. 213

Oil Field Practice, Special Metals in.—P. H. Brace. 181

Open Hearth Basic Slags, Action of Fluorspar on.—Lenher Schwerin (Cor. Abs.). 61, 83

—— —— **Steel,** Residual Metals in.—John D. Sullivan. 145

Oxide, Rapid Determination in Molten Steel.—J. J. Egan, A. B. Kinzel & R. J. Price. 96

Paper Industry, Metals and Alloys in.—J. D. Miller. 263

Patina, development on Copper after Installation.—J. R. Freeman, Jr. & P. H. Kirby. 67

Pickling Tank—J. R. Hoover. 100

Plastic Deformation at a Hole in Steel and **Magnesium** Alloy Plates.—R. H. Burns and R. H. Heyer. 284

Probability in Tin-Plate Practice.—Carl B. Post. 89

Production of Pure Chromium.—P. P. Alexander. 37

Properties of Aluminum and Two of its Alloys at Elevated Temperatures.—F. M. Howell & D. A. Paul. 176

—— —— **Ferrite** as Revealed by Scratch Hardness Tests.—H. W. Gillett (Ext. Abs.). 159

Pulp and Paper Industry, Metals and Alloys in.—J. D. Miller. 263

Rapid Determination of Oxide in Molten Steel.—J. J. Egan, A. B. Kinzel & R. J. Price. 96

—— **Development of Patina** on Copper after Installation.—J. R. Freeman, Jr. & P. H. Kirby. 67

Rate of Age-Hardening of Duralumin as Determined by Upsetting Tests.—J. O. Lyst. 57

Refractory Concrete.—R. T. Giles. 28

Research Pays Profits—Experiences in Successful and Unsuccessful Research.—H. W. Gillett. 23

Residual Metals in Open Hearth Steel.—John D. Sullivan. 145

Rimmed Steel Ingots, Manufacture.—J. H. Nead & T. S. Washburn. 43

Scratch Hardness Tests reveal Properties of Ferrite.—H. W. Gillett (Ext. Abs.). 159

Solid Solubility, Effect of Surface Strain on.—R. M. Brick & Arthur Phillips. 204

Some Metallurgical Aspects of the Present Production of Steel and other Ferrous Castings.—R. A. Bull. 1

—— **Principles** of Industrial Research.—H. A. Schwartz. 49

Special Metals in Oil Field Practice.—P. H. Brace. 181

Specifications for Men—What Industry Expects Metallurgists to Know When They Graduate.—Robert T. Ferguson, Jr. 199

Steel, Copper as an Alloying Element in.—H. L. Miller. 227

—— **and Magnesium Alloy Plates,** Plastic Deformation at a Hole in.—R. H. Burns & R. H. Heyer. 284

—— **and other Ferrous Castings,** Metallurgical Aspects of Present Production.—R. A. Bull. 1

Surface Strain, Effect on Solid Solubility.—R. M. Brick & Arthur Phillips. 204

Temper Carbon Nodules, Metallographic Determination of Size Distribution.—H. A. Schwartz. 139

Tin-Plate Practice, Probability in.—Carl B. Post. 89

Tire Failures, Discussion of the Causes.—Leland E. Grant. 231, 277

Transformation Temperature of Iron, Effect of Stress on.—J. L. Holmquist. 136

Vacuum Furnaces in Metallurgy.—N. A. Ziegler. 5

Viscosity of Basic Slags, Effect of Fluorspar on.—Lenher Schwerin. 118

Weld Deposits, Corrosion Tests on.—F. R. Hensel & C. S. Williams. 11

Welding Costs, Lowering by Careful Selection of Steels.—Wilmer E. Stine. 74

"Y" Lacquer, Development.—Robert W. Belfit. 147

Zinc Die Casting Alloy.—E. A. Anderson & G. L. Werley. 97
